

## District 4140 México

Name of Club: **Rotary Club Morelia Camelinas**

Name of Project : **Radiofrequency Generator for the treatment of Chronic Pain**

# 1. Introduction

Pain is defined as an unpleasant sensory and emotional experience associated with an injury. Pain is an alert mechanism that warns our body that it is suffering some kind of damage. However, there are situations where the pain does not end when the cause that originated it is resolved, persisting over time (chronic pain) and affecting different spheres of our life, both emotional, family and work. Chronic pain is considered a "disease" as such.

The population that requires attention in the public sector in pain clinic is very large and the public health system of our state does not have the possibility of attending to these patients with innovative and effective techniques for chronic pain, or with procedures that reduce excessive spending on medicines.

## 2. Objective

Radiofrequency is one of the tools available for the management of chronic pain. It is considered as a minimally invasive percutaneous procedure for patients who do not respond appropriately to conventional treatment.

The objective is to achieve the donation of an LG2 Radiofrequency Generator equipment for chronic pain to the General Hospital "Dr. Miguel Silva" of Morelia, which will support patients in the state of Michoacán in the public sector in the care of this disease, **and thus reduce excessive expenses for pharmacological treatments.**

The impact of the donation of this equipment will benefit an average of 1834 (average of patients treated for chronic pain per year, by different diagnoses; children, young people and adults).

## 2. Objective

This donation will support the treatment of patients treated for chronic pain caused by various conditions such as:

- Facial pain (especially trigeminal neuralgia)
- Radial cervical or lumbar pain
- Facet syndrome Sacroiliac pain
- Glenohumeral pain
- Myofascial pain
- Complex regional pain syndrome
- Cases of post-surgical pain
- Gonarthrosis
- Cancer

We will impact the following areas of interest:

- Prevention and treatment of diseases.
- Improve the quality of life and economy of patients who require clinical pain treatment.

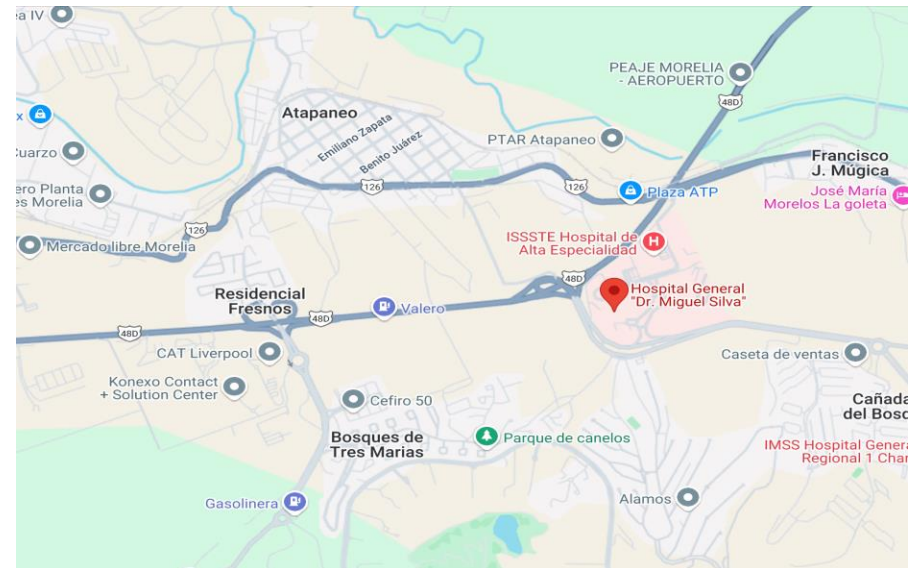

## 3. Location

The General Hospital "Dr. Miguel Silva" is located in the city of Morelia, capital of the state of Michoacán, where patients from all over the state are treated.

Address: Bosques de Eucalipto # 415, Ejido de Atapaneo, C.P. 58253, Morelia, Michoacán.
